For Use With SynCalc Spreadsheet Program

SynCalc Templates are designed to save you hours of valuable time when you're creating spreadsheets for many business applications and personal financial matters. Included are 22 of the most commonly used spreadsheet formats and formulas for financial planning, budgeting and record keeping. The Templates are designed to be used in conjunction with the SynCalc Electronic Spreadsheet.

• Rate of Return Calculations • Linear Regression Calculation • Statement of Net Worth • Mortgage Payment Analysis • Financial Ratio Analysis • Single Server Waiting Line (Queue) Model • Two Server Waiting Line (Queue) Model • Stock Portfolio Evaluation • Bond Portfolio Evaluation • Checking Account Register with Account Analysis • Checking Account Register without Account Analysis • Personal Appointment Calendar • Portfolio Valuation • Economic Order Quantity with Backorders • Economic Order Quantity without Backorders • Economic Order Quantity with Fixed Production Rate • Expense Reports • Personal Property Inventory and Valuation • Cost Analysis of Buying vs. Renting a Home • Metric Measurement Conversion Table • Cost Analysis of Painting a Room • Kitchen Measurement Conversion Table.
